Vancouver, B.C. Canada

Customer Comments

"I have used these access panels in the past. They work very well and are easy to install."
project manager, Oklahoma City

"They look great. The trades have installed them all already."
estimator, heating contractor

"The hotel was very impressed with the stealthiness of the panels and we used our mock-up of the sample you sent to really sell them on the idea. Once they saw the panel covered with the corridor wallpaper and only the 1/8" reveal around the unit they decided it was the best access panel situation we could ever hope for. You probably should expect a call from the contractor for the project."
architect, Louisiana

"Very timely to receive your sample. We will use them all the time from now on."
interior designer

"Everybody likes them. The architect is very happy."
general contractor

"My superintendent tells me that he was pleased with the quality and ease of installation of the panels. I appreciate you caring enough to ask."
developer, Santa Fe

"We can use them for access to hot tubs and steam units and set the tile right onto them."
"I'm thinking of using them with millwork."
interior design team
